Partloads

Partloads is shipments that are not processed at a terminal, but forwarded directly, non-stop from sender to recipient. The shipments are usually larger than 2.5 tonnes, and can comprise part or whole shipments.

The agreement linked to the product is based on net prices adapted to the needs of the individual customer. For more information or a quote, please contact our local sales office.

If you already are a customer and have an agreement with us at Partloads, you can download your net prices at www.PostNord.no

Partloads

Partloads is dry goods forwarded as whole or part shipments direct to recipients in Norway. The shipments must have a freight calculation weight over 2.5 tonnes, and the parcels must not be larger than what can be handled with regular equipment and transportable in regular transport units. It must be possible to pick up and deliver the shipments direct with the carrier vehicle (truck, container, semi-trailer with max. height 4.2 metres). Deliveries on trucks with rear lifter by agreement. Larger parcels by agreement.

Thermo

Thermo is the solution for transport of temperature-sensitive products. Thermo is usually full-load units such as semi-trailers and containers, unless shipments can be transported by special agreement. PostNord provides thermo-transport in Norway, the Nordic region, Europe and overseas destinations partly on its own, partly using associated companies and partly with other partners.

Project

Project is a tailor-made solution whereby we deploy earmarked transport vehicles in closed, schedule-based transport routes.

Together with the customer, we develop regular routes customised according to pick-up and delivery times. The transports can be arranged for long distances or within the customer's local area. Routes can also be developed for two or more customers where this would be more cost effective for those concerned. Project division earmarks one or more persons who, in cooperation with the customer, undertake to conduct goods-flow-analyses and solutions, recommend transport vehicles, participate in implementation at the customer's and at PostNord, administer and conduct agreements, carry out quality assurance and follow up the financial conditions.

Freight Calculation

Freight calculation

Freight calculated is based on weight and the freight zone between the place zones in mainland Norway for the sender's and recipient's delivery address/location number, respectively, with possible surcharge.

The freight calculation weight

The freight calculation weight for one parcel is its real weight (rounded upward to the next whole kilo) though with at least 1 kg per 3.5 dm³ (DPD and Groupage) or 1 kg per 3.0 dm³ (Partloads/Fullloads). The volume/cubic measurement is calculated by the parcel's greatest length, width and height..

Example Groupage

Real weight: 86 kg. Measurements: h. 44 cm, w. 75 cm, l. 110 cm (0.44 m × 0.75 m × 1.10 m) = 363 dm³ 363 dm³/3.5 = 104, i.e. 104 kg calculated freight weight.

If the goods are of such a nature (e.g. machines, appliances) that nothing can be loaded beside them or on top of them, or that the goods in question might damage other goods, they will be freight calculated according to load metres. One load meter is 2000 kg for Groupage and Partloads/Fullloads. Load metres are stated in

metres with one decimal point.

Freight calculation weights above 1000 kg are rounded up to the nearest 100 kg (per shipment). When freight-calculating goods strapped or shrink-wrapped onto a pallet, whether a non-returnable pallet or a Euro pallet, the shipment's measurements and weight including the pallet's measurements and weight shall be used. Minimum calculation weight per pallet (general cargo only) is 200 kg.

Freight calculation for DPD and Groupage is calculated for each individual parcel and added together.

Partloads: The weights are rounded upward to the nearest 100 kg.

The maximum freight in a weight group is always the minimum freight in the next weight group. One load metre is calculated as 2000 kg (1 Euro pallet = 0.4 load metres = 800 kg).

Other additions and provisions

Delivery at special hours

Usually deliveries are made between 0800 and 1600, with certain local adjustments. For delivery to private recipients, see the separate section. Deliveries before, after or between certain hours must be arranged with the driving office at the reception terminal. Such special-hour deliveries carry an additional fee.

Delivery fee DPD Business parcel

Distribution of DPD Business parcel outside of core areas is charged with a fee of NOK 18 per parcel.

Exchange of Euro pallets

Two alternative schemes are offered for the exchange of Euro pallets.

Exchange

Certified Euro pallets are exchanged (returned to the goods sender) provided that:

- The exchange is documented with a numbered pallet receipt. Other documentation is not accepted.
- The goods sender is charged for part of the palletexchange expenses. The service costs NOK 38 per exchanged Euro pallet.

Pallet exchanges are invoiced continuously based on pallet receipts. Pallet debt is settled upon returning the pallets, unless another form of settlement is agreed between the parties.

Non-exchangeable pallets

Euro pallets that are secured to the load by straps, plastic or similar, and clearly marked with a red sticker reading "Non-returnable pallet", will not be exchanged. The pallet is then a matter between the goods sender and the goods recipient. The goods sender cannot bill the goods recipient for the pallet unless the pallet is secured and labelled as described above. The sticker that is used is the same as that used by the major transport operators and can be purchased at our terminals. A roll of 1000 stickers costs NOK 265.

See separate folder describing this arrangement.
